

Contents

Introduction	5
Velocity models and inversion techniques:	
V. Bucha: Kirchhoff prestack depth scalar migration of complete wave field using the prevailing–frequency approximation of the coupling ray theory	7
Waves in anisotropic elastic media:	
V. Farra & I. Pšenčík: PS–wave moveout in anisotropic media of arbitrary symmetry and tilt	31
Ray theory for isotropic viscoelastic media:	
I. Pšenčík, M. Wcisło & J. Carcione: Comparison of ray and full–wave synthetic seismograms of reflected SH waves in attenuating media	55
Ray theory for anisotropic viscoelastic media:	
L. Klimeš: S–wave polarization vectors in anisotropic viscoelastic media	69
DVD–ROM with SW3D software, data and papers:	
V. Bucha & P. Bulant (eds.): SW3D–CD–25	89
